Features Implemented	Backend Routes / Models	Frontend Components	Total Test Cases

Checkbox legend: %j Pass %j Fail %j Partial (mark after testing)

A. SECURITY & AUTHENTICATION				
#	Layer	Feature	How to test	Expected result
A-01	Backend	Password min 10 chars	Go to /auth !' Sign Up. Try password "short123" (8 chars). Then try "ValidPass10!".	Short password is rejected with validation error. 10-char password proceeds.
A-02	Backend	Common password block	Try to sign up with password "password123" or "qwerty12345".	Server returns error: "This password is too common."
A-03	Backend	Disposable email block	Sign up with test@mailinator.com or test@tempmail.org.	OTP not sent. Error: "Disposable email addresses are not allowed."
A-04	Backend	Banned user login block	In Admin panel, ban a test account. Then try to log in with that account.	Login rejected: "Your account has been suspended. Contact support@noorstudio.app."

B. SESSION MANAGEMENT				
#	Layer	Feature	How to test	Expected result
B-01	Full Stack	Active sessions list	Log in on two different browsers. Go to /app/preferences !' "Active sessions" section.	Both sessions listed with device type and active time. Current session shows active badge.
B-02	Full Stack	Logout all other devices	On Browser A click "Sign out all other devices." Switch to Browser B and navigate to any /app/* route.	Browser B is redirected to /auth. Browser A session remains active.
B-03	Backend	New device login alert email	Log in from a different IP (e.g., VPN). Check the registered email inbox.	Email received: "New device login detected from [IP]. Please verify your account."

C. EMAIL PREFERENCES & UNSUBSCRIBE				
#	Layer	Feature	How to test	Expected result
C-01	Frontend	Preferences page loads	Navigate to /app/preferences.	Page loads with 3 sections: (1) Email notifications with 4 toggles, (2) Active sessions, (3) Privacy & data.
C-02	Full Stack	Save email preferences	Toggle off "Marketing & promotions." Click "Save changes."	Toast: "Preferences saved." Refreshing page, settings remain off.
C-03	Backend	One-click unsubscribe link	Open any marketing email. Click the "Unsubscribe" link in the footer.	Confirms unsubscribe without requiring confirmation. All marketing emails disabled for that user.

D. GDPR DATA EXPORT				
#	Layer	Feature	How to test	Expected result
D-01	Full Stack	Download my data	Go to /app/preferences !' "Privacy & data" !' Click "Download my data."	Browser downloads a JSON file with user profile, projects, characters, and tokens.
D-02	Backend	Export auth guard	Open a private window and call GET /api/user/export without a token.	Server returns 401 Unauthorized. No data leaks.

E - IN PRODUCT REPORT BUTTON				
#	Layer	Feature	How to test	Expected result
E-01	Frontend	Report button in editor	Open any project at /app/projects/:id. Look at the dark status bar at the very bottom of the editor.	A small flag icon button is visible. shows tooltip "Report this content"
E-02	Frontend	Report dialog flow	Click the flag icon. Select "Inappropriate content." Add a description. Click "Submit Report."	Dialog shows green checkmark state: "Report submitted. Our team will review this shortly."
E-03	Admin	Report in admin queue	After submitting a report, go to /admin !' Reports tab.	Report appears with status "pending review". Admin can click Review, Dismiss, or add Note.

F - ADMIN PANEL				
#	Layer	Feature	How to test	Expected result
F-01	Admin	Admin access guard	Log in as a regular user. Navigate to /admin.	Access denied — redirect or error message. Only role:admin accounts can enter.
F-02	Admin	Stats dashboard	Log in as admin. Open /admin. Observe the 6 stat cards.	Cards show: Total Users, Signups, Active Subs, Banned, Projects, All Time Revenue Today. Auto-refresh every 60s.
F-03	Admin	Ban / Unban user	Users tab !' 3-dot menu !' "Ban user" !' enter reason. Then unban via same menu.	User row shows banned indicator. Banned count increments. Banned user can't login. Unban restores login.
F-04	Admin	Adjust credits	Users tab !' 3-dot menu !' "Adjust credits" !' enter +50 !' Submit.	Toast: "Credits adjusted." Credit count for user in table updates immediately.
F-05	Admin	View user books	Users tab !' 3-dot menu !' "View books."	Modal opens with a table of that user's books: title, status, creation date.
F-06	Admin	Refund via Stripe	Users tab !' 3-dot menu !' "Refund" !' enter a Stripe charge ID and amount.	Toast: success. Refund is processed. User row in Stripe dashboard.

G - ADMIN MARGIN DASHBOARD				
#	Layer	Feature	How to test	Expected result
G-01	Admin	Margin tab loads	Go to /admin !' click "Margin" tab.	Three cards: Est. MRR (\$), AI Cost, Gross Margin (%). Margin is color-coded: green/amber/red.
G-02	Admin	Daily chart	Observe the bar chart below the metric cards.	Up to 14 rows, each with date label, revenue bar, red cost bar, and \$ label on right.

H - COOKIE CONSENT BANNER				
#	Layer	Feature	How to test	Expected result
H-01	Frontend	Banner for new users	Open app in incognito (or clear localStorage). Navigate to any page.	Cookie consent banner appears at bottom: "Reject non-essential" and "all" buttons.
H-02	Frontend	Accept persists	Click "Accept all." Refresh the page.	Banner does not reappear. localStorage.noor_cookie_consent = "all".
H-03	Frontend	Reject persists	Clear localStorage. Click "Reject non-essential." Refresh.	Banner does not reappear. localStorage.noor_cookie_consent = "essential".

I - IN-APP ONBOARDING TOUR				
#	Layer	Feature	How to test	Expected result
I-01	Frontend	Tour appears (new accounts)	Use account <7 days old. Clear noor_onboarding_seen from localStorage. Wait ~2 seconds after login.	Onboarding tour dialog opens automatically. Step 1 "Create your Universe" with header + progress dots.
I-02	Frontend	Tour navigation (4 steps)	Click "Next" through all 4 steps: Universe ! Characters ! Knowledge Base ! Generate Book.	Each step shows correct icon, title, description, and action button. On "Create my first book" links to /api/characters.
I-03	Frontend	Skip persists	Click "Skip tour." Refresh the page.	Tour does not reappear. localStorage.noor_onboarding_seen = "true" in localStorage.

J - NPS FEEDBACK WIDGET				
#	Layer	Feature	How to test	Expected result
J-01	Frontend	Widget appears (7d+ accounts)	Account older than 7 days. Clear noor_nps_last_shown from localStorage. Wait ~10 seconds.	NPS widget slides in at bottom-right. Header "Share feedback" with score button.
J-02	Full Stack	Score + comment submit	Select score 8. Enter optional comment. Click "Submit."	Widget shows green checkmark "Submitted" state. Score stored — verify via GET /api/feedback as admin.
J-03	Frontend	Minimize & dismiss	Click ">" chevron to minimize. Click floating "Share feedback" pill to restore. Click X to dismiss.	Minimize collapses to pill button. Floating button works. Dismiss hides for 30 days (localStorage key).

K - CANCELLATION & SAVE FLOW				
#	Layer	Feature	How to test	Expected result
K-01	Frontend	Modal opens (no browser confirm)	Go to /app/billing. Click "Cancel Plan" (visible when subscription is active).	A multi-step modal opens — NOT a browser native confirm() dialog. Title: "No, you go — why are you canceling?"
K-02	Full Stack	Survey step	Select a reason (e.g., "It's too expensive"). Add optional feedback. Click "Continue."	Survey submitted to POST /api/p cancel-survey. Modal advances to next step.
K-03	Frontend	Save offer — keep plan	On offer step, click the "Keep your plan + credits" card.	Toast: "Keep creating! Your plan remains active." Modal closes. Subscription unchanged.
K-04	Full Stack	Confirm cancellation	On offer step click "No thanks, still cancel." On confirm step click "Yes, cancel subscription."	Subscription cancelled in Stripe (cancelAtPeriodEnd=true). Toast says "Cancelled." Billing page shows "Cancels on [date]"

L - CREDIT ROLLOVER ON UPGRADE				
#	Layer	Feature	How to test	Expected result
L-01	Backend	Upgrade bonus credits	Note current credit balance. Upgrade from Creator to Author plan via /app/billing.	Credit balance increases by +50 (bonus). Transaction history shows "bonus: creator !' author".
L-02	Backend	Credits never reset on upgrade	Check credit balance before and after upgrading from Creator to Studio.	Existing credits are preserved. Studio upgrade adds +150 bonus on top of balance.

M - AI USAGE & FEEDBACK ENDPOINTS				
#	Layer	Feature	How to test	Expected result
M-01	Admin	AI Usage tab	Go to /admin ! "AI Usage" tab. Toggle between 7d / 14d / 30d views.	Table updates with provider, model, success/fail icon, and token count. Summary bar shows totals.
M-02	Full Stack	Feedback endpoint	Submit NPS score via widget (J-02). Then call GET /api/feedback as admin.	Response includes npsAverage and total records with type, score, comment, timestamp.
M-03	Backend	Unauthenticated feedback blocked	POST to /api/feedback without an Authorization header.	Server returns 401 Unauthorized.

41 test cases | Backend routes added: 14 | New models: 4 (Session, Feedback, Report, StripeEvent) | New frontend components: 10
